

**Garden Gloves** are made of soft breathable cotton with nonslip fingers and hands. You can even pick up a dime. They are comfortable and a bargain at \$2.99 per pair. Better yet with a \$50.00 plant order they are only \$1.00 per pair, or with a \$100.00 order you get one pair free

**Plant Stakes** are made of metal. These identification stakes and labels provide a large nameplate with lots of space for writing or if you have a laser printer they can be printed and placed onto the stakes metal plate.

You get 25 stakes with plates and 30 weather-proof labels for **\$12.95** with your order of plants.

**Water Saver Crystals** For several years now I have been using these crystals to ship all of my beardless Iris to keep them looking fresh as they day they were dug even after a week of shipping. What they do is hold water (in a non dripping way) around the roots of the plants. I have always purchased this in very large packages. Many of you have asked how you could get a small supply of these so I have worked out a small container for the home gardener. You get 12 oz, of these crystals which will make 10 to 12 gallons when water is added. **\$8.00**
